A termination notice was recently sent to the laundry services company, the long distance service has been changed, rock is to be applied only in critical situations and EPM has completed a review of the Justice Center HVAC equipment and has been directed to proceed with an engineering plan for further information and discussion.

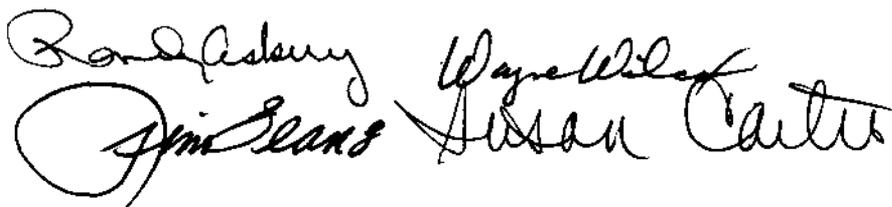

The equipment line item in the Commission budget currently reflects a \$-2834.00 balance. This balance is due to the purchase of three laptops to be used specifically for county business. A question was sent to Attorney Ivan Schrader regarding ownership of old bridges on county roads which had been abandoned over 5 years ago. His response was assuming that a road was legally abandoned that under normal circumstances the property/bridge would revert to the land owner adjacent to the road. Consequently, per current Randolph County road policies regarding abandonment of a road after five years of continuous non-use by the public and the commission's interpretation of that policy, the commission deems the bridge located near county road 1120 to fall on a legally abandoned road. Therefore, the commissioners believe that Eric Shaw's request to dismantle the bridge for the steel does not fall under the county's authority but under landowners' authority adjacent to the bridge in question.

Upon contacting Mr. Shaw, he requested documentation in writing as to our findings.
