Countywide Enhanced Enterprise Zone (EEZ) Public Hearing

11:00 a.m., Com. Carter called the public hearing to order with the following present (see attached sign in sheet. Carol Shoemaker, Missouri Department of Economic Development, presented information on the EEZ Program. The program started in 2005 and has grown from a \$4 million tax credit to a \$24 million tax credit this year, with \$10 million still available for this year. They are looking for an increase again next year. There are 58 zones in the State of Missouri and this would be 60 or 61. Ms. Shoemaker will check on the exact number. There are 86 businesses already approved with over \$400 million investment in the last 3 years. There is a 50% tax credit for 10 years and the tax credit is on actual dollar amount wages. The EEZ will complete all of Randolph County that will qualify. Contact for the local zone will be Joel McNutt, a Sales Representative for the state of Missouri. Ms. Shoemaker announced that once the application is completed, it will take 2-4 weeks to get through the approval process. To qualify, the business must invest a minimum of \$100,000 and provide a minimum of two new jobs.

At the conclusion of Ms. Shoemaker's comments, Com. Carter opened the hearing to other comments. Gene Johnson of Moberly expressed concerns about tax abatement. He was informed that taxes never go below base and any incentive (50% for 10 years) goes on real property only. Personal property is taxed at 100% and there is no abatement. He was also informed that the EEZ will possibly increase buying and enhance the County's tax base. According to Form 14 from the State, for every dollar spent \$7.86 comes back to the community. The criterion for this is established by the State and not by the County. Johnson expressed that he is having reservations.

11:45 a.m., Asking for further comments and hearing none, Com. Carter adjourned the public hearing.

Since last month, reviews have been made regarding inmate laundry services, long distance phone services, rock purchases and more efficient utility usage. A termination notice was recently sent to the laundry services company, the long distance service has been changed, rock is to be applied only in critical situations and EPM has completed a review of the Justice Center HVAC equipment and has been directed to proceed with an engineering plan for further information and discussion.

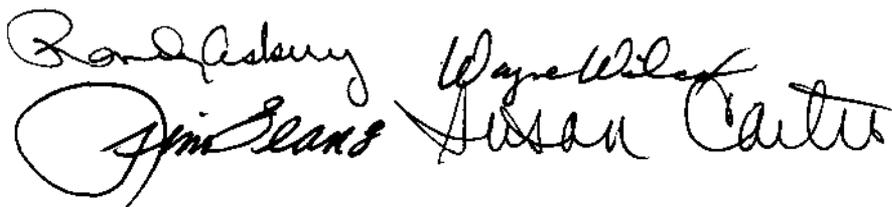

The equipment line item in the Commission budget currently reflects a \$-2834.00 balance. This balance is due to the purchase of three laptops to be used specifically for county business. A question was sent to Attorney Ivan Schrader regarding ownership of old bridges on county roads which had been abandoned over 5 years ago. His response was assuming that a road was legally abandoned that under normal circumstances the property/bridge would revert to the land owner adjacent to the road. Consequently, per current Randolph County road policies regarding abandonment of a road after five years of continuous non-use by the public and the commission's interpretation of that policy, the commission deems the bridge located near county road 1120 to fall on a legally abandoned road. Therefore, the commissioners believe that Eric Shaw's request to dismantle the bridge for the steel does not fall under the county's authority but under landowners' authority adjacent to the bridge in question.

Upon contacting Mr. Shaw, he requested documentation in writing as to our findings.
